SquareSpace: <http://squarespace.com/>

SBTC: <http://www.sbtcsupport.org/>

## Guidelines

1. Reminder: school websites are public documents and are windows to see what the school is doing.
2. Assigned personnel will update site content, including announcements, articles, images, etc, at least once a week.
3. The calendar should be generated and updated live whenever possible. If not available, updated calendars should be posted not less than weekly.
4. Personnel should be listed on the website, and the listing should remain current. Personnel listings should also include contact information for every employee.
5. Use only student first names and pictures if allowed by parents outlined in signed photo release form.
6. Website content is accessible via both desktop and mobile systems, and is appropriately formatted for both.
7. Test all links regularly for accuracy and activity. A monthly maintenance cycle is suggested.
8. Page length no longer than 2 screens unless logical pattern.
9. All data should be grouped together (tabs on top or side).
10. Documents and files on the school site should be formatted in the most universal formats available.
